```
VNC (Virtual Network Computing)

It uses RFB protocol (Remote Frame Buffer)
port -> 590x

===========
sudo apt update

sudo apt install -y tigervnc-standalone-server xfce4 xfce4-goodies dbus-x11 xauth xfonts-base

vncpasswd

vncserver -localhost no

=================
[if you don't mention -localhost no  ==> it will allow display through SSH tunnel ]
[for the security you can create a tunnel and use the display]
[don't trust this solution over the internet]

UltraVNC -> Enter Server IP -> Enter Password.
```
